This article talks about the importance of international exams in the life of students and what opportunities they create for them, which exams are important to show the student's knowledge. The reasons for the increasing importance of IELTS, Cambridge and other prestigious exams among students have also been shown.

Keywords National and international exams , Multilevel, TOEFL, IELTS, PISA, competitive exams, International Baccalaureate (IB) exams, study abroad, world standards, student's syllabus, academic syllabus, scholarship, Cambridge English, PET, , FCE, CAE, CPE, PTE, OET.

INTRODUCTION

Today, changes are taking place in all spheres of our society, rapid developments are taking place to meet world standards, including technology and science, which great changes and significant advancement are being achieved. Olympiads, competitive exams, and gifted program entrance exams are excellent ways to harness the quality of learners' attitudes in children. Participating in these exams allows children to gather in-depth knowledge regarding the subject and prepare them for a great career ahead. So, on the initiative of our president, according to the decree No - 395 dated May 13, 2019, "On the implementation of national

and international evaluation system certificates for admission to higher education institutions" today encourages young people to get deeper knowledge.

We can see national and international Olympiads are competitive exams conducted at a global level that examines the talents in the learners such as analytical thinking, reading, writing, logical reasoning problem-solving and more. Furthermore, exams helps students to develop expertise and enhance their propensity , which will help them in the long run. The International Olympiad is conducted amongst students from various schools across the globe

making the students more competitive to face difficult situations in the future. These exams are held once a year and are scheduled according to the academic schedule. The International Olympiad is conducted for students from Class 1 to 10. These exams are outlined in line with the school syllabus and are conducted in an online mode which makes it easier for the students to take the exams. The international Olympiad conducts scholarship exams at the international level. The part of these exams includes the scholastic curriculum. The olympiads covers. Maths Olympiad (IMO), Science Olympiad (ISO) English Olympiad (IEO), General Knowledge Olympiad (IGKO). These exams test the student's knowledge and understanding level on each subject which improves their competitive performance at the international level. Exams sharpen the students inborn and acquired skills with comprehension and practice which adding to one's psychological capacities also, for the understudies , intelligent thinking and science abilities are put to test.

MAIN PART

Exams are a test that shows the level of knowledge of students. In this, each student will demonstrate his knowledge gained over the years through an exam. In addition, in today's developed era, there are exams aimed at deeper learning of languages and ensuring that students study in foreign countries. Thousands of aspirants migrate various parts of the world every year to complete their higher studies. There are achieved by clearing competitive international entrance exams. Good performances in competitive 'study abroad' exams also support you to win scholarship and other forms of financial aid. We can see some of the most popular and most important international entrance exams includes the SAT, IELTS, LSAT, GTE, GMAT. These are required for admission to universities and colleges in various fields.

There are several international exams in the education sphere that are recognized and widely accepted for assessing students' knowledge and skills. Some of the most well-known international exams include:

1. Programme for International Student Assessment (PISA) is a worldwide study conducted

by the Organization for Economic Cooperation and Development (OECD) to evaluate the educational systems of countries by assessing 15-year-old students' performance in reading, mathematics, and science.

2. International Baccalaureate (IB) exams offer a range of internationally recognized exams, including the Primary Years Programme (PYP), Middle Years Programme (MYP), and Diploma Programme (DP). These exams assess students' knowledge and skills across various subjects and are widely accepted by universities worldwide.

3. Cambridge International Examinations (CIE) offer a range of international qualifications, including the Cambridge Primary Checkpoint, Cambridge Lower Secondary Checkpoint, Cambridge IGCSE, and Cambridge International AS & A Level. These exams are recognized by universities and employers globally.

These international exams in the field of education are opening the door to a wide range of opportunities for users. For instance as we mentioned above PISA project assesses young people's ability to think creatively and critically, apply their knowledge in practice, and encourages them to develop these skills.

For students who are learning English as a second language, there are several international exams specifically designed to assess their English language proficiency. These exams can be valuable for showcasing language skills to universities, employers, or for immigration purposes. Some of the most useful international exams for English language learners include:

1. Test of English as a Foreign Language (TOEFL) is a widely accepted English proficiency test used by universities and institutions worldwide. It assesses the ability of non-native English speakers to understand and use English in an academic setting. TOEFL scores are often required for admission to English-speaking universities and for visa applications.

2. International English Language Testing System (IELTS) is another popular English proficiency test accepted by universities and organizations globally. It assesses the four language skills -

listening, reading, writing, and speaking. IELTS scores are commonly used for university admissions and visa applications. IELTS is another widely accepted English proficiency test used by universities and organizations to assess English language skills of non-native speakers.

3. Cambridge English Exams are a series of exams offered by Cambridge Assessment English. These exams include the Cambridge English: Preliminary (PET), Cambridge English: First (FCE), Cambridge English: Advanced (CAE), and Cambridge English: Proficiency (CPE). They assess language skills across various levels, from intermediate to advanced, and are recognized by universities and employers worldwide.

4. Pearson Test of English (PTE) is an English language proficiency test that assesses listening, reading, speaking, and writing skills. It is widely accepted by universities and institutions, particularly in Australia and New Zealand.

5. Occupational English Test (OET) is designed specifically for healthcare professionals who wish to work or study in an English-speaking country. It assesses English language proficiency in a healthcare context and is recognized by regulatory healthcare bodies, universities, and employers.

They provide a standardized and recognized measure of English language proficiency, allowing individuals to demonstrate their language skills for academic, professional, or immigration purposes.

Also, national exams are a test that shows the comprehensive knowledge of students. Multilevel national certificates, which show students' language level, also create a number of opportunities for students. Multilevel exam is useful for everyone in our country.. Multilevel exams are designed to assess student's knowledge of English rather than measure them against a standard they may not reached yet. This makes the test -taking experience inclusive for a broader range of students.

According to foreign language, English International Olympiad (EIO): Being good in English subject and scoring well in it is absolutely essential for all students. English is the base of all other subjects in school level and even for

appearing in future competitive exams. English International Olympiad (EIO) exam is based on the respective school curriculum pattern and focusses on the learning and improvement of English grammar, spellings, sentence formation and structure, language skills. So , today, the number of applicants for the ielts international certificate is increasing. Because this certificate is accepted all over the world, it opens up an opportunity for students to study abroad.

In accordance with the decision of the Cabinet of Ministers of the Republic of Uzbekistan "On measures to implement national and international evaluation system certificates for admission to higher education institutions" dated May 13, 2019 No. 395, foreign language (English, German, French, Spanish, Turkish, Arabic) applicants who have applied for bachelor's degree programs and have certificates such as TOEFL, IELTS, CEFR, SAT General, SAT Subject are given the maximum score without exams in this subject.

In our country, young people who have obtained high results in international and national exams are covered by the state. It also motivates our young people to study. National and international exams always show the level of knowledge of students in each field. Also, we need sufficient knowledge and skills to participate in such exams. Such exams open up opportunities for students.

CONCLUSION

These international exams provide standardized assessments that help compare educational systems, benchmark student performance, and facilitate international mobility and recognition of qualifications. These international exams provide a standardized and recognized measure of English language proficiency, allowing students to demonstrate their language skills for academic, professional, or immigration purposes. They can be valuable credentials for students learning English as a second language.

National and international exams play a crucial role in determining the level of knowledge of our young people and in their development as mature people and staff in the future. After all, the future of the country, whose children are knowledgeable,

mature, striving for innovation, will be bright. More and more young people are studying foreign languages, winning prizes and working hard to build their future.
